

GEDA®

LIFT 200 STANDARD LIFT 250 COMFORT FIXLIFT 250

Proven a thousand times over –
the ideal transport helper at the
construction site

Easy assembly without tools

Robust workmanship

Comprehensive safety features

Variety of load carrying devices

GEDA LIFT

Fast and easy installation without tools, the robust workmanship, the small footprint and the versatile application options of the GEDA LIFT have already been popular with craftspeople from all sectors for decades. There is a reason why more than 90,000 items of the traditional product from GEDA have already been sold.

Special accessories enable virtually all types of materials to be transported upwards to the roof and into the building. Whether for bricklayers, interior fitters, roofers, tilers or floor installers, the GEDA LIFT has the right load handling devices for any construction material and any application.

Three different lift options with lifting speeds up to 38 m/min are available to suit the conditions at the construction site. An AC power connection is sufficient to transport materials up to 250 kg. The load capacity depends on the design of the aluminium ladder sections, the inclination and the rail length.

GEDA[®] REMOVAL HOIST

GEDA REMOVAL HOIST

The GEDA Removal Hoist puts an end to cumbersome carrying of bulky furniture or heavy moving boxes through small staircases.

Three different variants are available, which can be used individually depending on the situation on site. The transport professional is available in the following versions: "GEDA Removal Hoist 200 Standard", "GEDA Removal Hoist 250 Comfort" and "GEDA Removal Hoist 250 Perfect".

Depending on the type, the hoist transports up to 250 kg quickly and safely up to a maximum height of 18.3 m.

All models have a small footprint – during transport and during use. Narrow pavements or tight courtyards are no problem for the GEDA removal lift.

If particularly delicate pieces of furniture or removal goods have to be transported, we recommend using the "GEDA Removal Lift 250 Perfect". The hoist is equipped with a special soft start feature which ensures particularly gentle transport.

Technical data:

250 kg

18.3 m

0-15-30 m/min

1.5 kW/230 V/50 Hz/16 A

GEDA[®] SOLARLIFT

GEDA SOLARLIFT

The GEDA Solarlift gently transports highly-sensitive solar elements and photovoltaic modules quickly and safely to the roof. The specially designed solar platform ensures careful transport of the valuable modules and holds the sensitive cargo safely in place.

The GEDA Solarlift also scores when it comes to transport and storage. It can easily be transported to its deployment site as the components can be dismantled into individual pieces. Once at the construction site, the device impresses with quick and easy assembly without additional tools and the small size of the compact base unit means that it can be installed even at sites with difficult access conditions.

In addition to the single-level variants GEDA Lift 200 Standard and GEDA Lift 250 Comfort, the two-level GEDA Fixlift 250 is also available.

The load capacity in each case depends on the design of the aluminium ladder sections, the inclination and the rail length.
